Medicare Beneficiary Summary File (MBSF) Base with Medicare Part A, B, C, and D, Version 2 Codebook

MAY 2026 | VERSION 1.2

Revision Log

Date	Changed by	Revisions	Version
May 2026	K. Schneider	Clarified that MDCR_STATUS_CD_MM may have missing values	1.2
October 2025	K. Schneider	Noted retired values starting in 2024 for CST_SHR_GRP_CD_01-12 and embellished the Comment. Clarified value 10 for the monthly DUAL_STUS_CD_01-12 and embellished the Comment. Refined Comment for the PTD_CVRG_STRT_DT	1.1
March 2025	B. Bragg K. Schneider	Created initial codebook	1.0

Tips on Navigating the Codebook

This document is a detailed codebook that describes each variable in the Medicare Beneficiary Summary File (MBSF) Base with Medicare Part A, B, C, and D, Version 2 research files. The guide includes several ways for users to quickly find the information they need:

- A complete listing of all variables in the files, in alphabetical order based on their SAS variable names
- Individual entries for each variable contain a short description of the variable, the possible values for the variable, and notes discussing the variable construction and use

The CCW team has included hyperlinks throughout the codebook to make it easier for analysts to navigate between the table of contents and the detailed entries for the individual variables:

- Clicking on any variable name in the Table of Contents takes users to the detailed description for that variable
- From the detailed description for any individual variable, clicking on the [^Back to TOC^](#) link after each variable description takes analysts back to the Table of Contents

Table of Contents

This section of the Codebook contains a list of all variables in alphabetical order based on the SAS variable name.

Variable Details

This section of the codebook contains variable details to facilitate understanding and use of the variables.

AGE_AT_END_REF_YR

LABEL:	Age of Beneficiary at End of Year
DESCRIPTION:	This is the beneficiary’s age, expressed in years and calculated as of the end of the calendar year, or, for beneficiaries that died during the year, age as of the date of death.
LONG NAME:	AGE_AT_END_REF_YR
TYPE:	NUM
LENGTH:	3
SOURCE:	CMS Common Medicare Environment (CME) (derived)
VALUES:	X–XXX
COMMENT:	CCW calculates this variable, and sets the maximum value to 115 (years).

[^ Back to TOC ^](#)

BENE_BIRTH_DT

LABEL: Beneficiary Date of Birth

DESCRIPTION: This is the beneficiary's date of birth.

LONG NAME: BENE_BIRTH_DT

TYPE: DATE

LENGTH: 8

SOURCE: CMS Common Medicare Environment (CME)

VALUES: MM/DD/YYYY

COMMENT: —

[^ Back to TOC ^](#)

BENE_DEATH_DT

LABEL: Date of Death

DESCRIPTION: This variable indicates the date of death of the beneficiary. A null value means that no death date was reported for the beneficiary.

LONG NAME: BENE_DEATH_DT

TYPE: DATE

LENGTH: 8

SOURCE: CMS Common Medicare Environment (CME)

VALUES: —

COMMENT: Many of these dates have not been verified with official U.S. records; the valid date of death switch variable (BENE_VALID_DEATH_DT_SW) identifies the death dates which have been verified.

[^ Back to TOC ^](#)

BENE_ENROLLMT_REF_YR

LABEL:	Reference Year
DESCRIPTION:	This field indicates the reference year of the enrollment data.
LONG NAME:	BENE_ENROLLMT_REF_YR
TYPE:	NUM
LENGTH:	4
SOURCE:	CMS Common Medicare Environment (CME)
VALUES:	1999—current data year
COMMENT:	The data files are partitioned into calendar year files.

[^ Back to TOC ^](#)

BENE_HI_CVRAGE_TOT_MONS

LABEL: Part A Months Count

DESCRIPTION: Months of Part A coverage.

LONG NAME: BENE_HI_CVRAGE_TOT_MONS

TYPE: NUM

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME) (derived)

VALUES: 0–12

COMMENT: This variable is the number of months during the year that the beneficiary had Medicare Part A coverage. (This is sometimes referred to as health insurance coverage — or Medicare HI coverage).

CCW derives this variable by counting the number of months where the beneficiary had Part A coverage (i.e., the MDCR_ENTLMT_BUYIN_IND_XX variable equaled 1, A, 3, or C).

[^ Back to TOC ^](#)

BENE_HMO_CVRAGE_TOT_MONS

LABEL: HMO Coverage Count

DESCRIPTION: Months of Medicare Advantage (HMO) coverage.

LONG NAME: BENE_HMO_CVRAGE_TOT_MONS

TYPE: NUM

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME)

VALUES: 0–12

COMMENT: This variable counts the number of months during the year that the beneficiary received their Part A and Part B benefits through a managed care plan (i.e., a Medicare Advantage [MA] plan) instead of the traditional fee-for-service (FFS) program. Any month where the HMO indicator variable (HMO_IND_XX) is anything other than a 0 (not a member of an HMO) or a 4 (FFS participant in a case or disease management demonstration project) is counted as a MA month.

[^ Back to TOC ^](#)

BENE_ID

LABEL: Encrypted CCW Beneficiary ID

DESCRIPTION: The unique CCW identifier for a beneficiary.

The CCW assigns a unique beneficiary identification number to each individual who receives Medicare and/ or Medicaid, and uses that number to identify an individual's records in all CCW data files (e.g., Medicare claims, MAX claims, T-MSIS claims, and MDS assessment data).

This number does not change during a beneficiary's lifetime, and CCW uses each number only once.

The BENE_ID is specific to the CCW and is not applicable to any other identification system or data source.

LONG NAME: BENE_ID

TYPE: CHAR

LENGTH: 15

SOURCE: CCW

VALUES: —

COMMENT: —

[^ Back to TOC ^](#)

BENE_PTA_TRMNTN_CD

LABEL: Part A Termination Code

DESCRIPTION: This code specifies the reason Part A entitlement was terminated.

LONG NAME: BENE_PTA_TRMNTN_CD

TYPE: CHAR

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME)

VALUES: 0 = Not Terminated
1 = Dead
2 = Non-Payment of Premium
3 = Voluntary Withdrawal
9 = Other Termination

COMMENT: —

[^ Back to TOC ^](#)

BENE_PTB_TRMNTN_CD

LABEL: Part B Termination Code

DESCRIPTION: This code specifies the reason Part B entitlement was terminated.

LONG NAME: BENE_PTB_TRMNTN_CD

TYPE: CHAR

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME)

VALUES: 0 = Not Terminated
1 = Dead
2 = Non-Payment of Premium
3 = Voluntary Withdrawal
9 = Other Termination

COMMENT: —

[^ Back to TOC ^](#)

BENE_RACE_CD

LABEL: Beneficiary Race Code

DESCRIPTION: The race of the beneficiary.

LONG NAME: BENE_RACE_CD

TYPE: CHAR

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME)

VALUES:

- 0 = Unknown
- 1 = White
- 2 = Black
- 3 = Other
- 4 = Asian
- 5 = Hispanic
- 6 = North American Native

COMMENT: —

[^ Back to TOC ^](#)

BENE_SMI_CVRAGE_TOT_MONS

LABEL: Part B Months Count

DESCRIPTION: Months of Part B coverage.

LONG NAME: BENE_SMI_CVRAGE_TOT_MONS

TYPE: NUM

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME) (derived)

VALUES: 0–12

COMMENT: This variable is the number of months during the year that the beneficiary had Medicare Part B coverage. (This is sometimes referred to as supplemental medical insurance coverage — or SMI coverage.) CCW derives this variable by counting the number of months where the beneficiary had Part B coverage (i.e., the MDCR_ENTLMT_BUYIN_IND_XX variable equaled 2, B, 3, or C).

[^ Back to TOC ^](#)

BENE_STATE_BUYIN_TOT_MONS

LABEL:	State Buy-In Coverage Count
DESCRIPTION:	Months of state buy-in.
LONG NAME:	BENE_STATE_BUYIN_TOT_MONS
TYPE:	NUM
LENGTH:	3
SOURCE:	CMS Common Medicare Environment (CME)
VALUES:	0–12
COMMENT:	This variable counts the total number of months during the year when the beneficiary premium was paid by the state. State Medicaid programs can pay Medicare premiums for certain dual eligibles (i.e., for beneficiaries also enrolled in a state Medicaid program); this action is called “buying in” and so this variable is the “buy-in code.” Any month where the MDCR_ENTLMT_BUYIN_IND_XX variable was: A (Part A state buy-in), B (Part B state buy-in), or C (Part A and Part B state buy-in) is counted.

[^ Back to TOC ^](#)

COUNTY_CD

LABEL: County Code for Beneficiary (SSA Code)

DESCRIPTION: This code specifies the Social Security Administration (SSA) code for the county of identified through the beneficiary mailing address of the beneficiary.

LONG NAME: COUNTY_CD

TYPE: CHAR

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME)

VALUES: —

COMMENT: Each state has a series of codes beginning with '000' for each county within that state. Certain cities within that state have their own code. County codes must be combined with state codes in order to locate the specific county. The coding system is the SSA system, not the Federal Information Processing Standard (FIPS). In some cases, the code may not be the actual county where the beneficiary resides. CMS obtains the mailing address used for cash benefits or the mailing address used for other purposes (for example, premium billing) from Social Security Administration (SSA) and Railroad Retirement Board (RRB) Beneficiary Record Systems.

[^ Back to TOC ^](#)

COVSTART

LABEL: Medicare Coverage Start Date

DESCRIPTION: This variable is the date when the beneficiary first became enrolled in Medicare benefits (Part A or Part B coverage).

LONG NAME: COVSTART

TYPE: DATE

LENGTH: 8

SOURCE: CMS Common Medicare Environment (CME)

VALUES: —

COMMENT: Historic date of first Medicare coverage (may be prior to 1999, which is the earliest claim files available through CCW).

[^ Back to TOC ^](#)

CRNT_BIC_CD

LABEL: Current Beneficiary Identification Code

DESCRIPTION: The current beneficiary identification code (BIC) specifies the basis of the beneficiary's eligibility for cash payment programs, mainly Social Security. When the individual qualifies under another person's account (for example, as a spouse or child), the code identifies the type of relationship between the individual and primary beneficiary.

LONG NAME: CRNT_BIC_CD

TYPE: CHAR

LENGTH: 2

SOURCE: CMS Common Medicare Environment (CME)

VALUES:

10 = Railroad Retirement Board (RRB)
Retirement employee or annuitant
11 = RRB Survivor joint annuitant
reduced benefits taken to ensure
benefits for surviving spouse

LABEL: Part D Low-Income Cost Share Group Code — January through December

DESCRIPTION: This variable indicates the beneficiary's Part D low-income subsidy cost sharing group for a given month (e.g., January). The Part D benefit requires enrollees to pay both premiums and cost-sharing, but the program also has a low-income subsidy (LIS) that covers some or all of those costs for certain low-income individuals, including deductibles and cost-sharing during the coverage gap.

TYPE: CHAR

LENGTH: 2

SOURCE: CMS Common Medicare Environment (CME)

VALUES:

00 = Not Medicare enrolled for the month

01 = Beneficiary enrolled in Parts A and/or B, and Part D; deemed eligible for LIS with 100% premium subsidy and no copayment

02 = Beneficiary enrolled in Parts A and/or B, and Part D; deemed eligible for LIS with 100% premium subsidy and low copayment

03 = Beneficiary enrolled in Parts A and/or B, and Part D; deemed eligible for LIS with 100% premium subsidy and high copayment

04 = Beneficiary enrolled in Parts A and/or B, and Part D; enrolled in LIS with 100% premium subsidy and high copayment

05 = Beneficiary enrolled in Parts A and/or B, and Part D; enrolled in LIS with 100% premium subsidy and 15% copayment (retired after 2023)

06 = Beneficiary enrolled in Parts A and/or B, and Part D; enrolled in LIS with 75% premium subsidy and 15% copayment (retired after 2023)

07 = Beneficiary enrolled in Parts A and/or B, and Part D; enrolled in

LIS with 50% premium subsidy and 15% copayment (retired after 2023)	10 = Beneficiary enrolled in Parts A and/or B, but not Part D enrolled; employer receives RDS subsidy
08 = Beneficiary enrolled in Parts A and/or B, and Part D; enrolled in LIS with 25% premium subsidy and 15% copayment (retired after 2023)	13 = Beneficiary enrolled in Parts A and/or B, but not Part D enrolled. It is unknown whether the beneficiary has creditable prescription drug coverage elsewhere
09 = Beneficiary enrolled in Parts A and/or B, and Part D; no premium or cost sharing subsidy	Null/missing = Beneficiary was not found in cost sharing group data

COMMENT: Beneficiaries who are deemed eligible for fully subsidized Part D coverage due to dual enrollment in Medicare-Medicaid have a cost-share group code of 01, 02, or 03 for the month. Beneficiaries who are not dually enrolled but are eligible for a full LIS subsidy are classified as 04. Other beneficiaries who are eligible for the LIS but do not receive a full subsidy have a 05, 06, 07, or 08. The remaining values indicate that the individual is not eligible for subsidized Part D coverage. There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

Beginning with the 2024 benefit year CMS made changes to the Part D benefit structure so all individuals eligible for extra help receive a full (100%) subsidy. Prior to 2024, beneficiaries eligible for extra help may have received full or partial subsidies (e.g., 25-, 50-, or 75%-Part D low-income subsidy [LIS] or low-income total premium subsidy [LIPS]). This means the cost share group monthly values 05, 06, 07 and 08 are retired and no longer used after 2023.

Effective with MBSF ABDC V2, a beneficiary with a verified or unverified date of death will have a '00' for any month that is after the death date.

There is a late enrollment penalty for those who are eligible for Part D but choose not to enroll for any given year and do not have creditable coverage for that time. Several Medicare-eligible beneficiaries may have access to other types of prescription drug plans. Creditable prescription drug coverage includes, but is not limited to employer-based prescription drug coverage, including the Federal Employees Health Benefits Program (FEHB); qualified State Pharmaceutical Assistance Programs (SPAPs); military-related coverage (e.g., VA, TRICARE); and certain Medicare supplemental (Medigap) policies. For additional details regarding the creditable coverage provision of the Part D benefit, please refer to the CMS website at: <http://www.cms.gov/Medicare/Prescription-Drug-Coverage/CreditableCoverage/index.html?redirect=/CreditableCoverage/>.

DUAL_ELGBL_MONS

LABEL: Months of Dual Eligibility

DESCRIPTION: This variable is the number of months during the year that the beneficiary was dually eligible (i.e., he/she was also eligible for Medicaid benefits).

LONG NAME: DUAL_ELGBL_MONS

TYPE: NUM

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME) (derived)

VALUES: 0–12

COMMENT: The algorithm for this variable was updated with MBSF ABCD V2. CCW derived this variable by counting the number of months where the beneficiary had full or partial dual eligibility (i.e., months where DUAL_STUS_CD_XX equal to 01, 02, 03, 04, 05, 06, 08, or 10). Starting with MBSF ABCD V2, the DUAL_STUS_CD_XX value 10 identifies beneficiaries in Puerto Rico, Virgin Islands, and other territories with subsidized months; CMS includes these months in the count of dual months. There are different ways to classify dually eligible beneficiaries — in terms of whether he/she is enrolled in full or partial benefits. Additional information regarding various ways to identify dually enrolled populations, refer to the document [CCW Technical Guidance: Options in Determining Dual Eligibles](#).

DUAL_STUS_CD_11

DUAL_STUS_CD_06

DUAL_STUS_CD_12

TYPE: CHAR

LENGTH: 2

SOURCE: CMS Common Medicare Environment (CME)

VALUES:

NA = Non-Medicaid

06 = Qualifying individuals (QI)

00 = Not enrolled in Medicare for the month

08 = Other dual eligible (not QMB, SLMB, QWDI, or QI) with full Medicaid coverage, including prescription Drugs

01 = Qualified Medicare Beneficiary (QMB)-only

09 = Other dual eligible, but without Medicaid coverage

02 = QMB and full Medicaid coverage, including prescription drugs

10 = Territory buy-ins (Subsidized months for beneficiaries in Puerto Rico, Virgin Islands, and other territories). Reference Comment below

03 = Specified Low-Income Medicare Beneficiary (SLMB)-only

04 = SLMB and full Medicaid coverage, including prescription drugs

05 = Qualified Disabled Working Individual (QDWI)

99 = Unknown

COMMENT: CMS obtained this information from the State Medicare Modernization Act (MMA) files in the original MBSF data product. This information has traditionally been considered the “gold standard” for identifying dual eligibles, but does not include information on U.S. territory dual eligible beneficiaries. The MBSF ABCD V2 sources its dual status data from a different CME source table that combines

information from MMA files with other sources of dual eligibility information, including data submitted by Puerto Rico and other U.S. territories, and plan transaction data from the Medicare Advantage/Prescription Drug System (MARx).

Dual eligibles are often divided into “full duals” and “partial duals” based on the level of Medicaid benefits they receive. CMS generally considers beneficiaries to be full duals if they have values of 02, 04, or 08, and to be partial duals if they have values of 01, 03, 05, or 06. Partial duals are sometimes divided into the QMB-only population (01) and all other partial duals (03, 05, or 06). There are different ways to classify dually eligible beneficiaries.

The addition of the dual status code value 10 in MBSF ABCD V2 includes subsidized months for Puerto Rico, Virgin Islands, and other territories to provide information regarding dual eligibility for all Medicare beneficiaries. Prior to MBSF ABCD V2, the MBSF data did not include complete information from territories such as Puerto Rico and the Virgin Islands, because these territories do not submit dual eligibility data to CMS through the MMA files. As a result, the dual eligibles from these territories were undercounted in the original MBSF. When territories submit data for the Medicaid and Children’s Health Insurance Program (CHIP) to CMS, it is available to the research community as the Transformed Medicaid Statistical Information System (T-MSIS) data. Territories cannot participate in the Medicare Savings Programs (MSP), which is available to states. Therefore, within T-MSIS, the territories use the value ‘08’ (full duals who are not eligible for Medicaid as a QMB, SLMB, QDWI, or QI; reference, for example, <https://www.medicaid.gov/tmsis/dataguide/t-msis-coding-blog/cms-guidance-reporting-expectations-for-dual-eligible-beneficiaries-updated/>). In other words, for territories, CMS finds the Medicare dual coverage code ‘10’ to be equivalent to a T-MSIS code ‘08’. Note that the income requirements and scope of benefits for dual eligible beneficiaries in the territories is different, when compared to the dual benefits for states (reference, for example <https://www.macpac.gov/wp-content/uploads/2019/07/Medicaid-and-CHIP-in-the-Territories.pdf>).

Additional information regarding various ways to identify dually enrolled populations, refer to the document [CCW Technical Guidance: Options in Determining Dual Eligibles](#). There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

Effective with MBSF ABDC V2, a beneficiary with a verified or unverified date of death will have a ‘00’ for any month that is after the death date.

[^ Back to TOC ^](#)

ENHANCED_FIVE_PERCENT_FLAG

LABEL: Enhanced Medicare 5% Sample Indicator

DESCRIPTION: This variable indicates whether the beneficiary was ever included in the CCW 5% sample for any year (1999+).

LONG NAME: ENHANCED_FIVE_PERCENT_FLAG

TYPE: CHAR

LENGTH: 1

SOURCE: CCW (derived)

VALUES: Y = Yes, included in enhanced 5% sample
Null = Not included in enhanced 5% sample

COMMENT: This enhanced 5% sample is broader than the annual 5% sample (variable that was previously called FIVE_PERCENT_FLAG; currently called SAMPLE_GROUP — when value = '01' or '04') because it includes all beneficiaries who were ever part of the 5% sample but had a HIC change that was not part of the sample. The "enhanced" indicator variable allows for longitudinal study of the 5% sample (i.e., once in, always in).

CCW creates the 5% sample using standard CMS processes. The 5% random sample consists of people who had a Medicare beneficiary Health Insurance Claim number (HIC) equal to the Claim Account Number (CAN) plus Beneficiary Identity Code (BIC) (HIC=CAN+BIC) where the last two digits of the CAN are in the set {05, 20, 45, 70, 95}.

[^ Back to TOC ^](#)

ENTLMT_RSN_CURR

LABEL:	Current Reason for Entitlement Code
DESCRIPTION:	Current reason for Medicare entitlement.
LONG NAME:	ENTLMT_RSN_CURR
TYPE:	CHAR
LENGTH:	1
SOURCE:	CMS Common Medicare Environment (CME)
VALUES:	0 = Old age and survivor's insurance (OASI) 1 = Disability insurance benefits (DIB) 2 = End-stage renal disease (ESRD) 3 = Both DIB and ESRD 4 = Beneficiary insured due to Part B Immunosuppressive Drug (PBID)
COMMENT:	This variable indicates how the beneficiary currently qualifies for Medicare. The current reason for entitlement can differ from the original reason that a beneficiary qualified for Medicare (reference the ENTLMT_RSN_ORIG variable). CMS obtains this information from the Social Security Administration (SSA) and Railroad Retirement Board (RRB) record systems.

[^ Back to TOC ^](#)

ENTLMT_RSN_ORIG

LABEL: Original Reason for Entitlement Code

DESCRIPTION: Original reason for Medicare entitlement.

HMO_IND_12

TYPE: CHAR

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME)

VALUES: N = Not enrolled in Medicare part A or B in the month, whether not enrolled but still alive, or died (with a verified or unverified date of death) (value effective with MBSF ABCD V2)
0 = Enrolled in Medicare A or B but not a member of an HMO in the month
1 = Non-lock-in, CMS to process provider claims
2 = Non-lock-in, group health organization (GHO; MA plan) to process in plan Part A and in area Part B claims
4 = Fee-for-service participant in case or disease management demonstration project
A = Lock-in, CMS to process provider claims
B = Lock-in, GHO to process in plan Part A and in area Part B claims
C = Lock-in, GHO to process all provider claims

COMMENT: Historically, most Medicare managed care plans have been health maintenance organizations (HMOs), hence the name of the variable.

Starting with MBSF ABCD V2, the values were expanded to distinguish between months enrolled without HMO coverage ('0') and months not enrolled in Medicare ('N'). In addition, a beneficiary with a verified or unverified date of death will have an 'N' for any month that is after the death date.

This variable indicates whether the beneficiary was enrolled in a Medicare Advantage (MA) plan during a given month.

The 01 through 12 at the end of the variable name correspond with the month (i.e., 01 is January and 12 is December).

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME)

VALUES: 0 = Not Medicare enrolled for the month
1 = Part A only
2 = Part B only
3 = Part A and Part B
A = Part A state buy-in
B = Part B state buy-in
C = Part A and Part B state buy-in

COMMENT: This variable indicates whether the beneficiary was entitled to Part A, Part B, or both for a given month. There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December). The variable also indicates whether the beneficiary's state of residence paid his/her monthly premium for Part B coverage (and Part A if necessary). State Medicaid programs can pay those premiums for certain dual eligibles; this action is called "buying in" and so this variable is the "buy-in code."

Effective with MBSF ABDC V2, a beneficiary with a verified or unverified date of death will have a '0' for any month that is after the death date.

[^ Back to TOC ^](#)

MDCR_STATUS_CD

LABEL: Medicare Status Code — Annual Indicator

DESCRIPTION: This variable indicates how a beneficiary currently qualifies for Medicare. This field is the latest valid value from the monthly Medicare Status Code field (MDCR_STATUS_CD_01–MDCR_STATUS_CD_12); if there is not a valid monthly MDCR_STATUS_CD during the year, then this value is derived from AGE_AT_END_REF_YR and ESRD_IND.

LONG NAME: MDCR_STATUS_CD

TYPE: CHAR

LENGTH: 2

SOURCE: CMS Common Medicare Environment (CME)

VALUES:

- 10 = Aged without end-stage renal disease (ESRD)
- 11 = Aged with ESRD
- 20 = Disabled without ESRD
- 21 = Disabled with ESRD
- 31 = ESRD only
- 40 = Beneficiary insured due to Part B Immunosuppressive Drug (PBID) (effective in 2023)

COMMENT: Analysts can use this variable to quickly distinguish between the aged, disabled, and ESRD populations.
This field is new starting with MBSF ABCD V2.

PTC_CNTRCT_ID_05

PTC_CNTRCT_ID_11

PTC_CNTRCT_ID_06

PTC_CNTRCT_ID_12

TYPE: CHAR

LENGTH: 5

SOURCE: CMS Common Medicare Environment (CME)

VALUES: The first character of the contract ID is a letter or number representing the type of plan:
H = Managed care organizations other than a regional PPO (i.e., local MA-PDs, 1876 and 1833 cost plans, Program of All-Inclusive Care for the Elderly (PACE) plans, private fee-for-service plans, or demonstration organization plans)
R = Regional preferred provider organization (PPO)
N = Not Part C Enrolled
0 = Not Medicare enrolled for the month
9 = Health Care Pre-Payment Plan (HCPP) — Section 1833 Cost Plan

COMMENT: If the beneficiary was not enrolled in a managed care plan for a given month, this variable will be 'N' for that month. Effective with MBSF ABDC V2, a beneficiary with a verified or unverified date of death will have a '0' Part C contract ID for any month that is after the death date.

Users need to know both the Part C contract number and plan benefit package (PBP; monthly variables called PTC_PBP_ID_XX) to identify the specific plan in which a beneficiary was enrolled. The 1833 cost plans do not have populated PBP_IDs.

There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

PTC_SGMT_ID_12

TYPE: CHAR

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME)

VALUES: Null/missing or a three-digit numeric value that includes leading zeros

COMMENT: If the beneficiary did not have a Part C plan for a given month, this variable will have null/missing value for that month; this includes beneficiaries not enrolled in Medicare for the month. If the beneficiary changed plans during the year, the value indicates market segment identifier for the final, reconciled PBP. A beneficiary with a verified or unverified date of death will have a null/missing Part C segment ID for any month that is after the death date.

There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December). Users must know the Part C contract number (PTC_CNTRCT_ID_XX) and plan benefit package (PTC_PBP_ID_XX) to determine the geographic market areas where the PBP was offered. Premiums may vary by market segment.

This field is new starting with MBSF ABCD V2.

TYPE: CHAR

LENGTH: 5

SOURCE: CMS Common Medicare Environment (CME)

VALUES: The first character of the contract ID is a letter or number representing the type of plan:
E = Employer direct plan (starting January 2007)
H = Managed care organizations other than a regional PPO (i.e., local MA-PDs, 1876 and 1833 cost plans, Program of All-Inclusive Care for the Elderly (PACE) plans, private fee-for-service plans, or demonstration organization plans)
R = Regional preferred provider organization (PPO)
S = Stand-alone prescription drug plan (PDP)
X = Limited Income Newly Eligible Transition plan (LINET)
N = Not Part D Enrolled
O = Not Medicare enrolled for the month
Null/Missing = Enrolled in Medicare A and/or B, but no Part D enrollment data for the beneficiary.

COMMENT: The first character of the contract ID is a letter that indicates the type of plan. If the beneficiary did not have a Part D plan for a given month, this variable will have a value of N, O, or be null/missing for that month. Effective with MBSF ABDC V2, a beneficiary with a verified or unverified date of death will have a 'O' Part D Contract ID for any month that is after the death date. If the beneficiary changed plans during the year, the value indicates the final, reconciled contract number. For 2006–2012, this variable was always encrypted to comply with CMS privacy rules.

There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

Users need to know both the Part D contract number and plan benefit package (PTD_PBP_ID_XX) to identify the specific plan in which a beneficiary was enrolled.

[^ Back to TOC ^](#)

RDS_CVRG_MONS

LABEL: Months of Retiree Drug Subsidy Coverage

DESCRIPTION: This variable is the number of months during the year that the beneficiary was enrolled in an employer-sponsored prescription drug plan that qualified for Part D's retiree drug subsidy (RDS). CCW derives this variable by counting the number of months where the beneficiary had retiree drug subsidy.

LONG NAME: RDS_CVRG_MONS

TYPE: NUM

LENGTH: 3

SOURCE: CMS Common Medicare Environment (CME) (derived)

VALUES: 0–12

COMMENT: A month of RDS is when the RDS_IND_XX for the month = Y.

Some employers offer prescription drug plans to their retirees, and Part D pays a subsidy to plans that offer coverage that is equivalent to (or better than) conventional Part D benefits.

CMS does not collect PDEs for beneficiaries that are enrolled in RDS-eligible plans.

[^ Back to TOC ^](#)

RTI_RACE_CD

LABEL:	Research Triangle Institute (RTI) Race Code
DESCRIPTION:	Beneficiary race code (modified using RTI algorithm). Enhanced race/ethnicity designation based on first and last name algorithms.
LONG NAME:	RTI_RACE_CD
TYPE:	CHAR
LENGTH:	1
SOURCE:	CMS Common Medicare Environment (CME) (derived)
VALUES:	0 = Unknown 1 = Non-Hispanic White 2 = Black (Or African American) 3 = Other 4 = Asian/Pacific Islander 5 = Hispanic 6 = American Indian/Alaska Native
COMMENT:	This variable is created by taking the beneficiary race code that has historically been used by the Social Security Administration (SSA) (and is in turn used in CMS's enrollment data base) and applying an algorithm that identifies more beneficiaries as Hispanic or Asian. This algorithm was developed by the Research Triangle Institute (RTI) and is thus often referred to as the "RTI race code." The algorithm classifies beneficiaries as Hispanic or Asian if their SSA race code equals 4 (Asian) or 5 (Hispanic), or if they have a first or last name that RTI determined was likely Hispanic or Asian in origin.

[^ Back to TOC ^](#)

SAMPLE_GROUP

LABEL: Medicare Sample Group Indicator

DESCRIPTION: Medicare 1, 5, or 20% strict sample group indicator.

LONG NAME: SAMPLE_GROUP

TYPE: CHAR

LENGTH: 2

SOURCE: CCW (derived)

VALUES: 01, 04, 15, null/missing (not included in 20% sample for the year)

COMMENT: CCW creates the sample values using standard CMS processes to identify the random 1, 5, 15, and 20 percent samples of Medicare beneficiaries.

The sample groups are based on a random 20 percent sample that is split into three mutually exclusive groups of 1 percent, 4 percent, and 15 percent.

To use the 1 percent sample, specify that SAMPLE_GRP equals "01".

To use the 5 percent sample, specify that SAMPLE_GRP equals "01" or "04".

To use the 15 percent sample, specify that SAMPLE_GRP equals "15".

To use the 20 percent sample, specify that SAMPLE_GRP equals "01", "04", or "15".

Beneficiaries are assigned to sample groups each year based on the last two digits of their Medicare Claim Account Numbers (CANs). Since CANs can change over time (e.g., in the case of remarriage), new beneficiaries are becoming eligible for Medicare, and existing beneficiaries are dying, the sample is cross-sectional. There is no guarantee that the exact same beneficiaries are represented in the same sample group from one year to the next (i.e., this is the strict sampling).

STATE_CNTY_FIPS_CD_10
STATE_CNTY_FIPS_CD_11
STATE_CNTY_FIPS_CD_12

TYPE: CHAR

LENGTH: 5

SOURCE: CMS Common Medicare Environment (CME)

VALUES: Five-digit numeric value, which can include leading zeros, or null (if there is no crosswalk from the SSA code to the FIPS code)

COMMENT: The first two digits specify the state; the last 3 digits specify the county.

This variable is derived by taking the SSA state/county code on record for the beneficiary in the CMS enrollment database and linking it to the corresponding FIPS state/county code.

A beneficiary with a verified or unverified date of death will have a null state/county FIPS code for any month that is after the death date.

There are 12 monthly variables — where the 01 through 12 at the end of the variable name correspond with the month (e.g., 01 is January and 12 is December).

[^ Back to TOC ^](#)

STATE_CD

LABEL: State Code for Beneficiary (SSA Code)

DESCRIPTION: The Social Security Administration (SSA) standard two-digit state code of a beneficiary's residence.

LONG NAME: STATE_CD

TYPE: CHAR

LENGTH: 2

SOURCE: SSA/CME

Samoa; otherwise unknown

COMMENT: The field name for this variable was updated with MBSF ABCD V2 (previously it was called STATE_CODE).

The state code is based on the latest state code for the beneficiary for the year in the CME data. If the value is missing, then the first state code in the following year populates this field.

[^ Back to TOC ^](#)

VALID_DEATH_DT_SW

LABEL: Valid Date of Death Switch

DESCRIPTION: This variable indicates whether a beneficiary's day of death has been verified by the Social Security Administration (SSA) or the Railroad Retirement Board (RRB).

LONG NAME: VALID_DEATH_DT_SW

TYPE: CHAR

LENGTH: 1

SOURCE: CMS Common Medicare Environment (CME)

VALUES: Null = Default
V = Valid death date

COMMENT: The date of death of the beneficiary is contained in the BENE_DEATH_DT variable; many of these dates of death are not confirmed.

[^ Back to TOC ^](#)

ZIP_CD

LABEL: Five-digit ZIP Code for Beneficiary

DESCRIPTION: This field specifies the zip code identified as the beneficiary mailing address.

LONG NAME: ZIP_CD

TYPE: CHAR

LENGTH: 5

SOURCE: CMS Common Medicare Environment (CME)

VALUES: Five-digit zip

COMMENT: In some cases, the code may not be the actual state where the beneficiary resides. CMS obtains the mailing address used for cash benefits, or the mailing address used for other purposes (for example, premium billing) from Social Security Administration (SSA) and Railroad Retirement Board (RRB) Beneficiary Record Systems.
