Tips on Navigating the Codebook

This document is a detailed codebook that describes each variable in the Medicare Beneficiary Summary File (MBSF) — National Death Index (NDI) Segment research files. The guide includes several ways for users to quickly find the information they need:

- A complete listing of all variables in the files, in alphabetical order based on their SAS variable names
- Individual entries for each variable contain a short description of the variable, the possible values for the variable, and notes discussing the variable construction and use

The CCW team has included hyperlinks throughout the codebook to make it easier for users to navigate between the table of contents and the detailed entries for the individual variables:

- Clicking on any variable name in the Table of Contents takes users to the detailed description for that variable
- From the detailed description for any individual variable, clicking on the [^Back to TOC^](#) link after each variable description takes users back to the Table of Contents

Table of Contents

This section of the Codebook contains a list of all variables in alphabetical order based on the SAS variable name.

Variable Details

This section of the codebook contains one entry for each variable in the Medicare Beneficiary Summary File (MBSF) National Death Index (NDI) segment files. Each entry has variable details to facilitate understanding and use of the variables.

BENE_ENROLLMT_REF_YR

LABEL: Reference Year

DESCRIPTION: This field indicates the reference year of the enrollment data.

SHORT NAME: RFRNC_YR

LONG NAME: BENE_ENROLLMT_REF_YR

TYPE: NUM

LENGTH: 4

SOURCE: CMS Common Medicare Environment (CME)

VALUES: 1999 forward

COMMENT: The data files are partitioned into calendar year files. Since the source data originate outside of CMS, the update cycle is not the same as the other MBSF segments and does not occur on any regular cadence. For years available, reference the CCW [Data Availability](#) web page.

[^Back to TOC^](#)

BENE_ID

LABEL: Encrypted CCW Beneficiary ID

DESCRIPTION: The unique CCW identifier for a beneficiary.

The CCW assigns a unique beneficiary identification number to each individual who receives Medicare and/or Medicaid and uses that number to identify an individual's records in all CCW data files (e.g., Medicare claims, Medicaid T-MSIS claims, MAX claims, and MDS assessment data).

This number does not change during a beneficiary's lifetime and each number is used only once.

The BENE_ID is specific to the CCW and is not applicable to any other identification system or data source.

SHORT NAME: BENE_ID

LONG NAME: BENE_ID

TYPE: CHAR

LENGTH: 15

SOURCE: CCW

VALUES: —

COMMENT: —

[^Back to TOC^](#)

DEATH_CERT_NUM

LABEL: NDI Death Certificate Number

DESCRIPTION: This field represents the death certificate number of the beneficiary.

SHORT NAME: DEATH_CERT_NUM

LONG NAME: DEATH_CERT_NUM

TYPE: CHAR

LENGTH: 6

SOURCE: Centers for Disease Control and Prevention (CDC) National Death Index (NDI)

VALUES: —

COMMENT: Numbers are not unique across years. Researchers wishing to obtain this NDI segment of the MBSF must obtain an additional approval beyond the CMS DUA.

[^Back to TOC^](#)

ENRL_SRC

LABEL: Enrollment Source

DESCRIPTION: This variable indicates the source of enrollment data.

SHORT NAME: ENRL_SRC

LONG NAME: ENRL_SRC

TYPE: CHAR

LENGTH: 3

SOURCE: CCW

VALUES: EDB = CMS Enrollment Database

CME = CMS Common Medicare Environment

COMMENT: The Centers for Medicare & Medicaid Services (CMS) has updated the Medicare enrollment source data for the Master Beneficiary Summary File (MBSF). As of March 2017, the MBSF includes Medicare enrollment information from the CMS Common Medicare Environment (CME) rather than the CMS Common Medicare Environment (CME). Data from the two sources was nearly identical. The CME improves the identification of Medicare Part B enrollment and allows for more timely release of the MBSF.

The universe of beneficiaries in the CME versus the EDB version of the MBSF are only slightly different.

Position 5: Nature of Injury Flag 0 = all other codes (always 0 for ICD-10 codes; 1999 forward)
COMMENT:	For decedents 1999–2006 there are up to 8 underlying conditions on the NDI record and for 2007 forward there are up to 20 underlying conditions (RECORD_COND_1–RECORD_COND_20). There is another version of the underlying cause of death conditions that is the unedited version from the death certificate (reference ENTITY_COND_1–ENTITY_COND_20).
